

IN THE CLAIMS:

1. (Currently Amended) A package of paper comprising a container manufactured from a disposable and biodegradable material; and at least one sheet of paper stored within the interior of the container; ~~characterized in that~~ wherein the container comprises mounting means for allowing a releasable attachment to the container of one or more electrical components for printing onto a sheet of paper stored within the container interior; and [in that] a portion of the container is movable relative to the remainder of the container so as to open an access aperture providing access to the container interior so as to allow for said attachment of a component by use of said mounting means.
2. (Original) A package of paper as claimed in Claim 1, wherein the container is manufactured from pulp fibre.
3. (Currently Amended) A package of paper as claimed in Claim 1 ~~or~~ 2, wherein the container comprises a honeycomb construction.
4. (Currently Amended) A package of paper as claimed ~~in any of the preceding claims~~ Claim 1, wherein an outer surface of the container is covered in a waterproofing material.
5. (Original) A package of paper as claimed in Claim 4, wherein said waterproofing material completely encapsulates the container.

6. (Original) A package of paper as claimed in Claim 5, wherein a line of perforations is provided in said waterproofing material adjacent an aperture in the container, said waterproofing material covering said aperture and said line of weakness extending around said aperture so as to provide said portion of the container movable relative to the remainder of the container.

7. (Currently Amended) A package of paper as claimed in ~~any of the preceding claims~~ Claim 1, wherein said mounting means comprises a resilient snap lock clip.

8. (Currently Amended) A package of paper as claimed in ~~any of the preceding claims~~ Claim 1, wherein said mounting means comprises means for mounting a motor to the container.

9. (Original) A package of paper as claimed in Claim 8, wherein said means for mounting a motor comprises a rail slider upon which a motor may be located and slid into a use position.

10. (Currently Amended) A package of paper as claimed in ~~any of the preceding claims~~ Claim 1, wherein an electrical connector is mounted on the container so as to receive and electrically connect with a further electrical connector mounted on a motor housing located in a use position relative to the container.

11. (Original) A printer chassis manufactured from a disposable and biodegradable material.
12. (Original) A printer chassis as claimed in Claim 11, wherein the chassis is manufactured from pulp fibre.
13. (Currently Amended) A printer chassis as claimed in Claim 11 ~~or 12~~, wherein the chassis comprises a honeycomb construction.
14. (Currently Amended) A printer chassis as claimed in ~~any of the preceding claims~~ Claim 11, wherein an outer surface of the chassis is covered in a waterproofing material.
15. (Original) A printer chassis as claimed in Claim 14, wherein said waterproofing material completely encapsulates the chassis.
16. (Original) A printer chassis as claimed in Claim 15, wherein a line of perforations is provided in said waterproofing material adjacent an aperture in the chassis, a portion of said waterproofing material covering said aperture and said line of weakness extending around said aperture so as to allow ready removal of said portion of material.
17. (Currently Amended) A printer chassis as claimed in ~~any of Claims 14 to 16~~ Claim 14, wherein said waterproofing material is bonded to the chassis.

18. (Currently Amended) A printer chassis as claimed in ~~any of Claims 14 to 17~~ Claim 14, wherein said waterproofing material is wax paper.

19. (Currently Amended) A printer chassis as claimed in ~~any of the preceding claims~~ Claim 14, further comprising means for mounting on the chassis a motor for driving relative movement between a printer head and paper to be printed.

20. (Original) A printer chassis as claimed in Claim 19, wherein said means for mounting a motor comprises means for releasably securing a motor to the chassis.

21. (Original) A printer chassis as claimed in Claim 20, wherein said releasable securing means comprises a resilient snap lock clip.

22. (Currently Amended) A printer chassis as claimed in ~~any of Claims 19 to 21~~ Claim 19, wherein said means for mounting a motor comprises a rail slider upon which, in use, a motor may be located and slid into a use position.

23. (Currently Amended) A printer chassis as claimed in ~~any of the preceding claims~~ Claim 14, wherein an electrical connector is mounted on the chassis so as to receive and electrically connect with a further electrical connector mounted on a motor housing located in a use position relative to the chassis, the printer further comprising a printer head electrically connected to said chassis mounted electrical connector.

24. (Original) A printer chassis as claimed in ~~any of the preceding claims~~ Claim 14, further comprising means for mounting on the chassis a printer head.

25. (Original) A printer chassis as claimed in Claim 24, wherein said means for mounting a printer head comprises means for releasably securing a printer head to the chassis.

26. (Original) A printer chassis as claimed in Claim 25, wherein said releasable securing means comprises a resilient snap lock clip.

27. (Currently Amended) A printer chassis as claimed in ~~any of the preceding claims~~ Claim 14, further comprising a printer head.

28. (Currently Amended) A printer chassis as claimed in ~~any of the preceding claims~~ Claim 14, further comprising means for mounting on the chassis a scanner head for scanning documents.

29. (Currently Amended) A printer assembly comprising a chassis as claimed in ~~any of the preceding claims~~ Claim 14, further comprising at least one sheet of paper to be printed, said paper being located within the chassis.

30. (Original) A printer assembly as claimed in Claim 29, comprising between 50 and 150 sheets of paper.

31. (Currently Amended) A printer comprising a chassis as claimed in ~~any of Claims 11 to 28~~ Claim 11.

32. (Currently Amended) A printer comprising a printer assembly as claimed in ~~Claims 29 or 30~~ Claim 29.
